

Access Teams from Game Consoles:

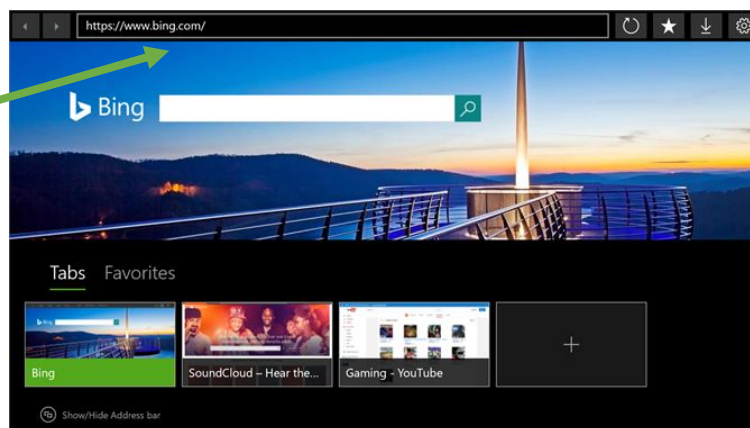

1. Go to "My Games and Apps"

2. Look for and open "Edge"

3. Type in the address bar: **teams.microsoft.com**

4. If prompted to go to the "Microsoft Store" select "No"
5. Login with your school email address and password as normal
6. Teams will now load and you can navigate using your controller

Tip: you can plug in a keyboard and mouse for easier use of Teams on your Xbox. There have reports of Teams being accessible on Playstation (via the built in web browser), however, initial testing shows that it doesn't work fully/reliably and doesn't allow to join meetings. However other office apps are accessible, but your experience may vary.
