

27 April 2020

Dear Parent and Carer;

Re: Teen Tech STEM Sessions

Due to the school's involvement with Teen Tech over the past two years we have been offered the chance to access some exciting STEM related innovation sessions they are providing. The first session is on Wednesday 29th April 2020 at 10am.

These sessions are most suitable for students in Years 10 and 11 and they will provide a great discussion point during interviews for further education.

The Innovation Sessions:

Every week Teen Tech will be offering students insight into world-class organisations and the opportunities that lie within them. Each session will be themed and hosted by sponsors and industry experts. Students can ask questions, develop their own solutions to global challenges and learn more about different careers.

Students will be able to watch a live presentation – email questions for our industry experts and then, when their project is completed join a live feedback session.

Please note that these sessions are run by an external host and as such require parents or carers to register and sign their children up for the sessions they wish to attend.

For more information and to register please use the link below;

<https://www.teentech.com/innovation-days-at-home/>

I would anticipate there being high demand for these sessions so I would advise you to register soon to avoid disappointment.

If you have any questions or your child would like some help with their projects please do not hesitate to contact me at s.romain@testbourne.school

Kind Regards

S. Romain
